For Land Rover 2014-2017 Range Rover Sport

04 / Climate control LCD for Land Rover/Jaguar

Synchronize terrain response modes

The Climate Control LCD visually displays the original vehicle's various terrain response modes, including gravel/snow/grass/rock crawl and sand etc., through an interface image. It provides the driver with real-time feedback on the vehicle's all-terrain mode switching, reflecting the pictorial and technological advantages of "what you see is what you get".

OEM style control knobs

The physical knob components that control the temperature have been mechanically and intelligently designed to give the driver a more realistic experience and sense of control. The combination of knob control and digital display makes driving more enjoyable.

Day/Night mode

Supporting day and night two display modes. It not only supports manual setting modes, but also supports switches automatically(following the car headlight switch).In addition, the driver can adjust the brightness of display to achieve a comfortable visual effect.

Non-destructive installation

Adopt the practice of original accessories with the original climate control panel socket. The installation only requires the climate control LCD screen to be directly connected to the original plug, no programming, truly a non-destructive plug and play.

ZF-2002 Climate control LCD
